

## How to install and register your SafeCurrent battery monitor

1. Scan the QR code on the device / box with your mobile.
2. Follow the link to <https://safecurrent.no/register>. (The IMEI number is automatically tracked from the QR code, otherwise enter it manually) Complete the registration form.
3. Attach the black wire to the battery's negative pole and the red wire to the positive pole.
4. Verify that the red light on the device blinks upon connection.
5. Attach the device on an appropriate surface using the tape provided.
6. Log on the web site to see the measurements collected. It may take as long as 60 minutes from registration to the first measurement is available.

A screenshot of a web registration form titled "Registrering". The form contains several input fields: "Navn" (Name), "E-post adresse" (Email address), "Passord" (Password), "Gjenstr. nummer" (Device number), "IMEI" (IMEI), and "Seriell nummer" (Serial number). Below the fields is a blue button labeled "Registrer deg" (Register yourself) and a "Logg inn" (Log in) link.
